

Garrison

Endurance upgrade with improved yield potential and test weight

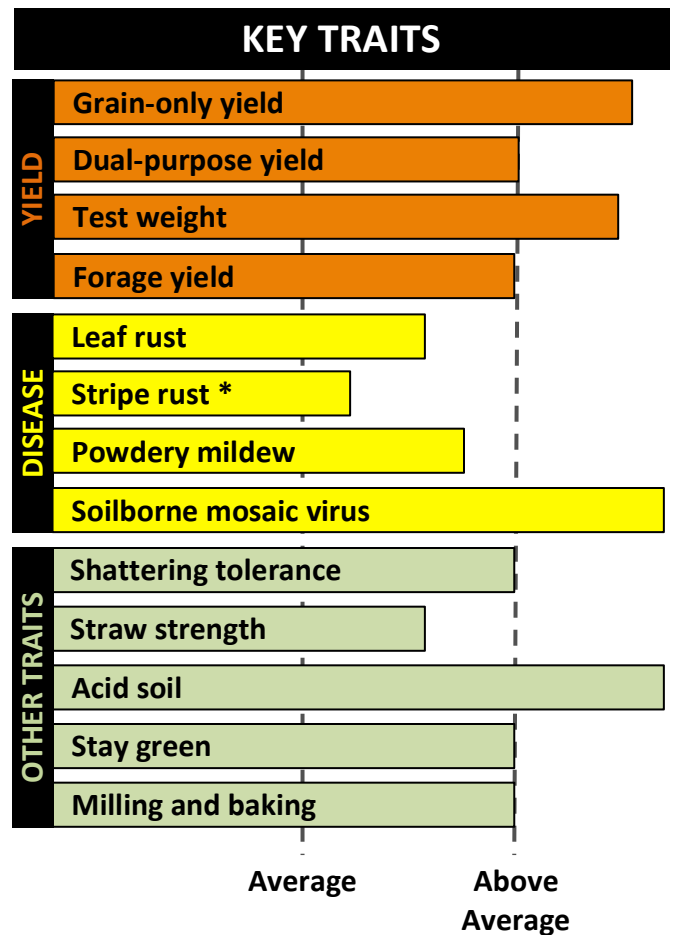

- Late maturity with winterhardiness and reduced susceptibility to spring freeze
- Broad adaptability for both low and high input environments in the southern Plains
- Good early-season leaf rust resistance with potential for late-season breaks in resistance
- *Resistant to pre-2012 races of stripe rust but moderately susceptible to the 2012 stripe rust races
- Offers best source of resistance to fusarium head blight (head scab) from OSU to date
- Septoria leaf blotch resistance for no-till or high-residue systems
- Resistance to Wheat Soilborne and Wheat Spindle Streak Mosaic Viruses
- Acid soil tolerance comparable to Duster
- Moderate tolerance to Barley Yellow Dwarf Virus
- Yield information for Garrison and other wheat varieties can be found at www.wheat.okstate.edu

Where to Purchase

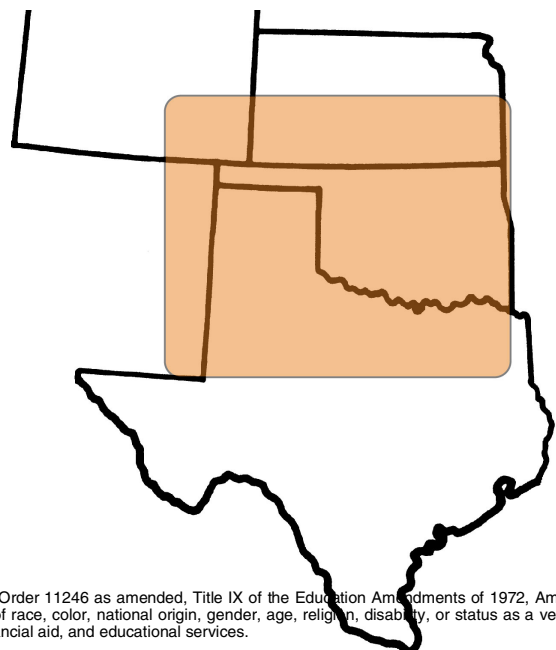

Garrison is marketed through a licensing agreement with Oklahoma Genetics Inc.
