

# Iba

## Duster parentage with outstanding test weight and broad area of adaptation

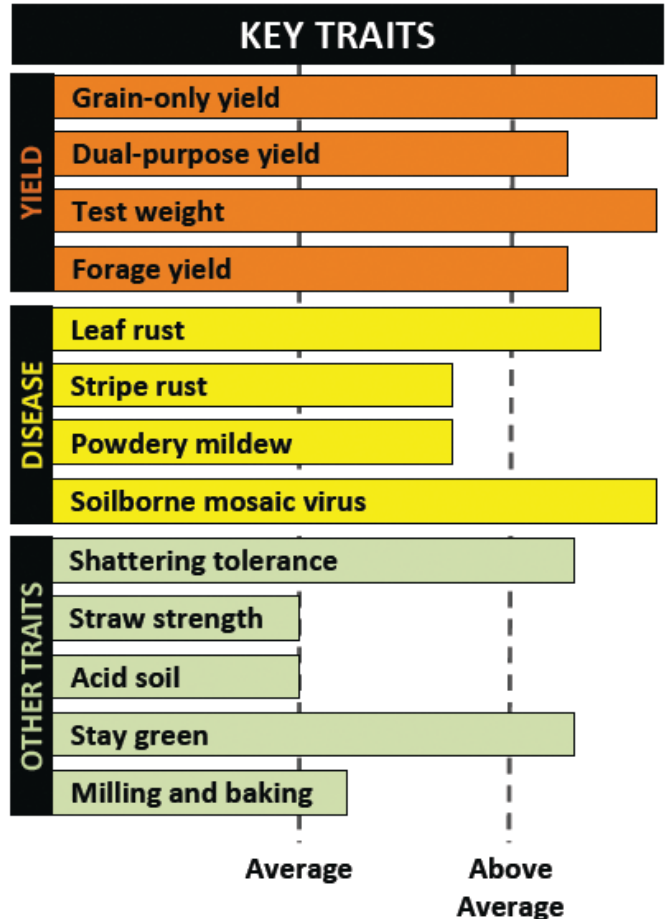

- Late maturity with winterhardiness and reduced susceptibility to spring freeze
- Very broad area of adaptation with proven yielding ability in performance tests from Kansas to Texas
- Resistant to current races of leaf rust
- Moderately resistant to stripe rust and powdery mildew
- Moderately resistant to tan spot
- Moderately resistant to BYDV
- Resistant to Wheat Soilborne and Wheat Spindle Streak Mosaic Viruses
- Iba is best suited for soil pH of 5.5 and above
- Adequate nitrogen fertility required to ensure acceptable grain protein
- Iba can show physiological leaf spotting in some environments
- Yield information for Iba and other wheat varieties can be found at [www.wheat.okstate.edu](http://www.wheat.okstate.edu)

### Where to Purchase

Iba is marketed through a licensing agreement with Oklahoma Genetics Inc.
